MYERS MIXERS, LLC

775/800 SERIES

The 775 and 800 Series dispersers are compact, rugged machines designed to reduce down time in demanding environments. All lubrication points are externally accessible to simplify the maintenance process and encourage on-time preventative schedules. Maximum performance capacity coupled with minimum height above the floor reduces the possibility of shaft vibration. More dispersion operation is achieved in less space, in less time, with more profit. Features include:

- Hoist and tank mount designs
- Air-over-oil hydraulic lift
- 775 Series available from 5 to 25 horsepower (HP)
- 800 Series available from 30 to 300 HP
- Batch sizes from portable tanks to 7,500 gallons for letdown and large batches
- Delivers full horsepower at the mixing shaft
- 360 degree hoist rotation available

DIMENSION TABLE FOR SERIES 775					
	(Standard - Inches)				
HP	A	B	C	D	E
5	99	61	38	54	4
7.5	99	61	38	54	4
10	122	74	48	87.5	9
15	122	74	48	87.5	9
20	122	74	48	87.5	9
25	122	74	48	87.5	9

DIMENSION TABLE FOR SERIES 800					
	(Standard – Inches)				
HP	A	B	C	D	E
30	122	74	48	87.5	9
40	143	89.5	54	89	9
50	143	89.5	54	94	9
60	143	89.5	54	94	9
75	156	96	60	116	9
100	187.5	115.75	72	125	12
